Due date: Tuesday, April 16, Class time
Submission method: D2L Dropbox hw3

Part I (Individual)

Read the article entitled “When Helping Hurts Summary” posted under Class 4 on the course web page. Then write a 1-2 page(ish) summary, relating your own experience and observations to what you read. Make it personal. Submit your summary to the hw3 dropbox in D2L.

Part II (Team)

The plan for this quarter is to form one team to leverage your various skills. I expect that the team will deliver a completed project design, prototype, and documentation by the end of the quarter. You will have significant control in timing, role assignment, and enforcement. Here are some things to consider as you put your team together:

1. Individual roles
2. Online support – D2L, OneDrive, etc.
3. Team identity – name, motto, vision, etc.
4. Individual assignments
5. Select a location and partnering agency, if possible
6. Plans for prototype design and construction
7. Search for granting agencies
8. Timeline – Gantt chart, MS Project etc.
9. Stretch goal - Find a minimum of 2 hours of meeting time outside of class
10. .... And much more

Make a team presentation on the due date (Tuesday, April 16), indicating your progress to date.
